

GAZETTEER OF NEPAL

This gazetteer is based on the Geographic Names Data Base, containing official standard names approved by the United States Board on Geographic Names and maintained by the National Geospatial-Intelligence Agency. More information is available at the Products and Services link at www.nga.mil.

Each entry shows the date a new feature was added to the Geographic Names Data Base or any part of an existing feature was modified

The coordinate system is WGS84

This version created by: Nigel James, Bodleian Library, 2005

The feature code (F Code) indicates the general classification used in the Geographic Names Data Base:

A = Administrative region
P = Populated place
V = Vegetation
L = Locality or area
U = Undersea
R = Streets, highways, roads, or railroad
T = Hypsographic
H = Hydrographic
S = Spot feature

District codes (0 = district not stated in GNDB)

Name	District	Lat (dd)	Lon (dd)	Lat (dms)	Lon (dms)	F Code	Date
